

Client: Smithsonian Institution – National Air and Space Museum

NATIONAL AIR AND SPACE MUSEUM FLIGHT SIMULATOR

NATIONAL AIR AND SPACE MUSEUM INSIDE THE INVENTION – EXHIBIT KIOSK

PROJECT OVERVIEW

Alexander & Tom created a series of interactive Kiosk displays for the Smithsonian's exhibit – the Wright brothers and the invention of the Aerial Age. These interactive programs, full of sight, sound and motion, allow the museum visitor to see inside the Wright brothers' inventions, and learn about the great attention to detail that went into every part of their flying machines.
